

DOW SERVICES

For 50+ years, **LATA** has been a leading technical service provider for the U.S. Department of War (formerly Department of Defense). LATA has performed a wide array of **Environmental** and **Engineering** services for numerous DOW agencies including: **U.S. Department of the Air Force**, Defense Logistics Agency, **U.S. Navy**, Defense Threat Reduction Agency, U.S. Army Engineering Research and Development Center, **U.S. Army Corps of Engineering** Districts (Baltimore, Buffalo, Huntsville, Kansas City, Louisville, Omaha, and Tulsa), and U.S. Army Space Command.

AREAS OF EXPERTISE

- Contaminated Facility D&D
- Environmental Investigation and Characterization
- Environmental Remediation Services
- Groundwater Modeling, Monitoring, and Sampling
- Human Health / Ecological Risk Assessments
- Landfill Design, Installation, Removal, & Closure
- NEPA & Regulatory Compliance
- PFAS Cleanup
- Project Chemistry, Validation, & Data Management
- Waste Management
- Engineering and Process Automation Design / Control
- Logistics Analysis & Planning
- Nuclear Engineering
- Program and Project Management
- Site Operations and Support
- Systems Engineering and Technical Assistance
- System Controls and SCADA
- Weapons of Mass Destruction Safety & Security

EXAMPLE PROJECTS

Air Force BECOS Task Order Contract, Midwest Region

LATA has executed multiple long-term task orders supporting environmental restoration, remediation, and compliance activities at 10 former Air Force installations in the Midwest. Includes groundwater and soil investigations, PFAS treatment and monitoring, vapor intrusion mitigation, feasibility studies, and site closeouts under CERCLA and RCRA. The work spans over a decade (2020–2030) and includes comprehensive site management, remedial optimization, risk assessments, and stakeholder engagement.

TX/LA Optimized Remediation Contract (ORC) & Texas Group Bases Performance Based Remediation (PBR)

LATA provides ongoing environmental restoration and optimization services for the Department of the Air Force, managing investigation, cleanup, and long-term monitoring (LTM) at 9 installations across TX & LA. Building on its prior Texas Group PBR work covering 77 sites at 5 Bases and the AFP4 facility, LATA continues to advance site cleanup through supplemental investigations, refined conceptual site models (CSMs), and optimized groundwater monitoring programs seeing reductions in contaminant mass and life-cycle costs (LCCs). Maintains full compliance with CERCLA and RCRA.

Long Term Operations (LTO)/LTM at 5 & 7 U.S. Army Installations, USACE, Kansas City District

LATA provides ongoing services under consecutive task orders covering a total of 7 Army installations across Kansas, Missouri, Illinois, and Ohio. For nearly a decade, LATA has managed environmental monitoring, maintenance at >40 inactive landfills, and performed groundwater sampling at more than 60 sites and 300 monitoring wells, ensuring regulatory compliance and remedy optimization through MAROS-based trend analysis, data validation, and annual reporting. LATA delivers cost-effective, multi-state environmental management solutions with consistent performance, quality, and stakeholder coordination.

Design-build Large On-Site Septic System, Hood Park, Lake Wallula, WA

LATA provided design-build engineering and construction services to set and install 10 treatment tanks, >700 ft of electrical trenching and new force main, aeration blowers, dosing and effluent pumps, followed by system shakedown and startup. LATA integrated civil, mechanical, and electrical engineering with environmental permitting and site investigation to deliver a compliant, fully operational wastewater treatment upgrade.

Former Pease AFB Airfield Interim Mitigation System, Design-Build SCADA Services for PFAS Cleanup, Portsmouth NH

LATA was subcontracted to provide a design/build PFAS solution for a facility-wide SCADA and instrumentation and controls system for cleanup of contaminated groundwater. The proposed Airfield Interim Mitigation System solution is designed to ensure the protection of human health by eliminating exposure to drinking water that may have PFOS and PFOA impacts above EPA lifetime health advisory values.

ACTIVE DOD CONTRACTS

US Army Corps of Engineers®

U.S. ARMY CORPS OF ENGINEERS

Kansas City District

- 2017 & 2022 Small Business Environmental Remediation Services (ERS) (as LATA-CTI JV)
- 2026 Small Business Pre-Placed Remedial Action Contract (PRAC) (as LATA-CTI JV)
- Inspection & Maintenance former Tongue Point Naval Air Station, Tongue Landfill
- LTRA Regional LTO/LTM for Five Installations
- LTRA Former Forbes Atlas Missile Site S-9

Louisville District

- Environmental Restoration Services Contract (ERSC) (as JV partner of CTL)
- ERS (as CTI-LATA JV)

Tulsa District

- Texas and Louisiana Group Bases Optimized Remediation Contract (ORC)

Walla Walla District

- Design-Build, Design-Bid-Build MATOC

U.S. AIR FORCE CIVIL ENGINEER CENTER

- BRAC Environmental, Construction, Optimization Contract (BECOS), Midwest Region (as LATA-CTI JV)
