

OVERVIEW

LATA is a leading provider of deactivation and demolition (D&D) services, and for over 15 years, LATA continues to provide services for commercial, Department of Defense (DoD) and Department of Energy (DOE) clients addressing hazardous and radionuclide contaminated buildings and appurtenances coupled with waste management services. LATA both self-performs and manages the D&D activities typically with fixed price contracts requiring a high degree of expertise in understanding the project complexity, issues, and production rates to ensure the projects are on-time and within budget.

AREAS OF EXPERTISE

- Project Management and delivery
- Deactivation/decontamination/decommissioning and demolition of hazardous and radiologically contaminated facilities
- Industry leader in waste management, industrial safety, and ES&H program support
- Waste characterization; DOT packaging evaluations; data package development and certification, packaging, and shipping
- Supporting engineering staff to address engineering controls, building modifications or facility upgrades
- Waste treatment systems design and operations

EXAMPLE PROJECTS

- Building demolition and Disposition of Oak Ridge K-33, a 2.8 million-square-foot structure (32-acre equivalent)
- D&D and rebuild of an 1,800-gpm groundwater treatment system including construction of the modified system following removal of piping and tank removal at the Fernald Preserve Site
- Demolition of numerous radiologically contaminated buildings at the Portsmouth Gaseous Diffusion Plant (PGDP) as part of the Maintenance & Operating (M&O) contract at the PGDP
- Demolition and removal of the bio-mass equipment inside Building 2719 in Oak Ridge; an active facility with tight space constraints for entry/exit and active components
